NEW MEDICAL CENTER BEING BUILT; KRYNICA RECONSTRUCTION FURTHERED

FIVE-STORY CENTER AT MOKOTOW -- Rzeczpospolita, No 241, 2 Sep 49

Construction of a new medical center on Madalinskiego Street in the Mokotow section of Warsaw is now under way. It will be a five-story structure with two wings. A four-story structure in the rear will provide housing and contain the boiler room. The medical center will provide modern consultation rooms, laboratories, waiting rooms, and facilities for therapeutic baths and therapeutic lamp treatments. The total volume of the buildings will be 28,493 cubic meters. Completion of the structure is expected in December 1950, or sooner.

HEALTH RESORT RESTORED -- kzeczpospolita, No 246, 7 Sep 49

The important mineral spring resort of Krynica was substantially destroyed and looted by the Germans. Reconstruction work has proceeded, primarily to salvage the mineral springs, flooded by ground waters, and to restore medical installations. At present, the resort is again in full operation. The production of dry ice and carton enhydride has already started. Mineral waters and their derivatives are being shipped in increasing quantities, with 655,000 bottles shipped this year.

Construction work, including restoration of the Zeglestov tunnel, has increased the number of visitors, which, this year, has exceeded 30,000. Work projects within the Six-Year plan provide for an increase in medical facilities. The supply of mineral drinking water will be increased and drilling will be conducted in search of carbonated saline water. Therapeutic baths and sanatoriums will be enlarged. Mineral water bottling facilities will be expanded to handle 5 million bottles a year.

A new hospital building 's under construction. The need for hospital facilities has been very acuts, and the nearest hospital is located at Nowy Sacz, 35 kilometers from Krynica.
